THE BLOCKSTAR Shooting Target

NO GOALIE? NO PROBLEM!

Features:

- Lightweight, portable target (about 2.25 lbs). Fits in a backpack!
- Easily attaches to a fence or regular sized goal!
- Encourages repetition of high scoring percentage shots.
- Great as a fill in goalkeeper for drills.

SETTING UP THE BLOCKSTAR

Step 1:

Remove the Blockstar Shooting Target from the carrying bag!

Step 3:

Continue on all sides to complete set up! Please note: The target is designed to leave the bottom corners open at baseboard height.

Optional Tips:

1. Use a step stool, cooler, or crate to make it easier to reach the top cross bar of the cage during set up!
2. To create a rebound, place a board in front of the middle of the target. Boards and weights placed inside the pouch may cause the seam to tear over time and is not covered by warranty. Instead, use a bungee though the pouch and tie the ends of the bungee around your rebound board to keep it in place!

Step 2:

Attach the bungees to the frame of the goal. Make sure the toggle is flush against the grommet (as pictured). This will prevent the bungee from slipping off.

Step 4:

Put the 18 foot bungee through the bottom pouch. Bring each end of the bungee under the posts and wrap around the sideboards. This will keep the bottom of the target down.

Warranty:

One Year Limited Manufacturer's Warranty on Manufacturing Defects Only. Does not cover normal wear and tear.
